

POWERPLAY — Quick Reference

Players: 3–5 | **Hand:** 3 Action + 2 Reaction | **Starting Hand:** 3 T1 Action + 2 T1 Reaction (RC-Z16-01)

Exchange Rates

3 Coins = 1 Influence | 2 Influence = 1 Power

Tier System (Action + Reaction)

Tier	Cost	Power Floor (play / draw / peek)
T1	Free	0 P
T2	1 IP	1 P
T3	2 IP	2 P

Power is **checked, not spent**. Action and Reaction decks are physically split into T1 / T2 / T3 piles (RC-Z15-04).

Asset Tiers

Tier	Cost	Buy Floor	Use Floor	Op Cost	Signing Bonus
T1	4 C	0 P	0 P	0	none
T2	8 C	1 P	1 P	1 C	Gain 1 IP
T3	14 C	2 P	2 P	2 C	Gain 1 Power

Round Structure

- Inception** — Draw 1 Event (resolve). Pre-Market Auction: each player picks an Asset deck, draws 1, public auction, drawer bids last.
- Opening Bell** — Each player takes 2 turns (clockwise from Leader). *Blitz: Turn 2 = Market Reversal (counter-clockwise).*
- Call-it-a-Night** — Trading window. Currency Conversion. Debt Settlement (loans **from supply**, IOUs **player-to-player**). Thievery (lowest Power assigns Leader).

Turn Structure

- Initiate** — Draw 1 card (Action OR Reaction) from a tier pile you meet the Power Floor for. Roll 1d6 per Asset Tier, collect income (Fiscal Table) minus Operating Costs. **Market Operations** (free, choose 1): Broker an Asset Deal (fee + draw 2, buy 1), Buy Action card (1 C), or Buy Reaction card (2 C).
- Action** — Exactly **1 Standard Action**: Play Action card | Sell Asset (to bank) | Take a Loan | Skip (+2 C). **Free Actions** (don't consume the action): Character Ability (once per turn, IP or Power cost), PowerPlay! (1 P → +1 Standard Action + draw 1 Action + 1 Reaction, Sacred, once per turn).
- Conclude** — Discard to 3A/2R. Voluntary loan repayment + loan cap check (max 2). Attach cleanup. Unfreeze all your Assets.

Reactions

Played out of turn in response to an Action, another Reaction, or an Event. Counter Tier-Up Rule (RC-Z14-03 + RC-Z15-02): T1 Action ← T1/T2/T3 Reaction; T2 Action ← T2/T3; T3 Action ← T3 only. **Reaction-vs-Reaction is tier-flat** (RC-Z15-03). Reaction chains capped at 2.

IOU (Defender Debt — player-to-player)

If an Action demands a resource the Defender lacks, they take a Coin IOU **owed to the Attacker** instead: insufficient IP → 4 C; insufficient Power → 7 C; insufficient Coin → (X+1) C. Max 2 new IOUs / Defender / round. Settled at CIAN Debt Settlement; unpaid → forced Asset liquidation (bank pays asset cost, Defender pays Attacker); elimination only if no unencumbered Assets remain. *Loans, by contrast, are player ↔ supply — see Manual § II.*

Fiscal Table (1d6)

Roll	T1	T2	T3
1	1	1	1
2	1	1	2
3	1	2	3
4	2	2	4
5	2	3	4
6	2	3	5

Game Modes

- **Standard:** 6 rounds, 3–5p
 - **Blitz:** 4 rounds, 5p (Turn 2 = Market Reversal)
 - **Long-Term:** 8 rounds, 3p
-

End Game

Clean the Books (after final CIAN): settle every outstanding loan (pay principal + 1 C, or default → asset → discard, bank pays cost, surplus to you). No elimination from loan default.

Scoring: $\text{Total Power} = \text{Power} + \text{floor}(\text{IP}/2) + \text{floor}(\text{C}/6) + \text{floor}(\text{AssetValue}/5)$ (RC-REF1-01: Coins scored at /6 vs Asset Value at /5 — Assets reward more than raw Coin hoarding.)

Tie-breaker: Best-of-3 Rock, Paper, Scissors, Lizard, Spock.

PR Bonus (Public Relations)

When you play a card / trigger an Asset ability / draw an Event, you may read its Humor text aloud. If any other player audibly reacts → gain **+1 Coin** from the supply.
